DEPARTMENT: COMPUTER SCIENCE

NAME: MILCA BELINDA NYONI

STUDENT NUMBER: N0125406J

SUPERVISOR: MRS S MOYO

PROJECT TITLE: MOBILE JOB PORTAL

YEAR: 2016

This Project is submitted to the National University of Science and Technology's Computer Science Department in partial fulfillment of the Bachelor of Science Honors Degree in Computer Science.

Abstract

This project is a mobile job portal that seeks to match job seekers to jobs posted by job recruiters that are in the system database. Traditionally, job seekers use newspapers, online job portals, company websites are used to search for jobs. The main problem is that the job seekers have to check these resources on a daily basis and this is a problem as these may not be easily accessible due to the limited resources that the job seekers might have. This project was undertaken so that a new, easily accessible platform for searching jobs and finding potential job candidates could be developed. The project addresses the mobile web platform as an option that can be used to search for suitable candidates for available job vacancies and suitable jobs for job candidates.
