- (ii) forms a basis for a vector space V .

[4 marks]

2. (a) State a theorem concerning the dimensions of the kernel and image of a linear transformation.

(b) Suppose that $T: \mathbf{R}^3 \rightarrow \mathbf{R}^7$ is linear. What are the possible dimensions of the kernel of T ? What would be the possible dimensions of kernel T if $T: \mathbf{R}^5 \rightarrow \mathbf{R}^3$?

(c) Let T be a linear map. Prove that $\ker T = \{0\}$ if and only if T is one-to-one.

[2 + 2 + 4 = 8 marks]
