**ABSTRACT**

The purpose of this research is to investigate the clothing curriculum at Chitungwiza Vocational Training Centre and critically examine the problems students face after completing the Course. Examine why the students fail to be employed after completing and find out what can be done to minimize these problems. This will help students to be marketable and be in a position to start their own projects as entrepreneurs. The study will attempt to expose learning problems encountered by students during the course and what could be done to eradicate these problems.

The findings indicated that clothing students were given less time for training. The number of lecturers was also limited. The equipment in the workshop was inadequate. Students were also not exposed to industrial attachment. The researcher with the aid of the research findings concluded that the clothing technology curriculum at Chitungwiza Vocational Training Centre to be reviewed.
